

Should the environment be on your boards agenda? Yes, regardless of your organizations mission! But governing green is more than simply the right thing to do. Rethinking fundamental practices that affect the environment, directly or indirectly, can improve your organizations operational efficiency, reduce costs, raise morale, and enhance your organizations image. Providing a step-by-step approach to create an organizational culture that supports a deep commitment to sustainability, this new book suggests appropriate entry points for board involvement. It explains how to formulate a vision and strategy, develop a sustainability policy, review investments, and provide oversight. Govern Green is the only book we know of that offers guidance to nonprofit boards and chief executives in how to develop an environmentally responsible approach to governance and management. We recommend it to ALL nonprofits.
