

JAP is a story about a young man who somehow, through a series of accidents intentions, mistakes and drive became a Naval Aviator, no mean feat by any accounts. Having survived the grim reaper several times during his eight years of flying on active duty with the Navy he has come to believe, sort of, that he is a good aviator and can take care of just about anything that arises in the realm of flying. He has disgustedly left active duty flying with the Navy as the result of witnessing inept officers who should never have made the grade continue to fly and serve without any leadership skills or command authority amounting to anything effective. Most of them were, in the young mans opinion, timid beings who were only concerned with keeping their status quo resulting in their refusal to make decisions let alone lead in any forward power projections. His decision to leave the Navy and throw his lot in with the airline pilots career was based on his perception that an airline captain just had to be made of stronger stuff. That idea was also doomed to an early failure when he actually started to fly with the pilots who make up the airborne operation of the airline. He found the same weaknesses on the part of the airline pilots that he had witnessed in the Navy pilots he had flown with. Still struggling to find perfection the young man (named Kruger in the book) tries flying with the Naval Reserve pilots only to find, once more, that those pilots were even worse than the two groups that he had flown with earlier. Krugers worst nightmare finally comes to pass when he finds himself making some bad mistakes and decisions just like all of the other pilots he has ever encountered. He has become a JAP or just another pilot like all of the others. In spite of all of the disappointments he encounters he still has fun and fulfillment flying and is convinced that he could really do no job other than flying. Flying has always
