

Purpose: Audio-Digest Foundation CME/CE activities are designed to provide its learners “physicians and other healthcare professionals” with continuing education that will help identify clinical problems in their practice settings, provide content to help to solve those problems, and increase their application of knowledge to practice. Audio-Digest Otolaryngology is specifically designed to provide the participant with state-of-the-art information, including, but not limited to, the diagnosis and management of: Head and neck cancer, Hearing loss, Sleep apnea, Asthma and allergy, Dysphagia, Otitis media, Thyroid diseases, Sinus diseases, Pediatric diseases, Vestibular disease, Headaches, Skin disease. The goal of this program is to review the American Thyroid Association (ATA) guidelines on thyroid nodules and differentiated thyroid cancer (DTC) and improve the management of patients with these conditions. After hearing and assimilating this program, the clinician will be better able to:

- 1: List important recommendations about extent of initial thyroid surgery as proposed by ATA guidelines.
- 2: Discuss current literature and initiatives to standardize terminology used for management of patients with thyroid nodules.
- 3: Use current guidelines and indications to better manage patients with thyroid cancer by appropriately doing central or lateral neck dissection.
- 4: Review indications for use of fine needle aspiration biopsy, rebiopsy, molecular markers, and frozen sections in management of patients with thyroid nodules.
- 5: Consider extent of follow-up and use of same-day surgery, based on review of current trends in management of patients with thyroid nodules.
