

Anxiety disorders are among the most prevalent forms of psychopathology across the life span. Although the onset of such disorders may occur at almost any point, in many cases they begin in childhood. In this book, the editors have brought together many of the fields most respected and innovative researchers and challenged them to take a fresh look at the major factors that contribute to the etiology and maintenance of anxiety disorders in childhood and across the life span. The result is a collection of chapters that will stimulate further theoretical and empirical efforts regarding these important issues.

The Real Diana, Practical Exercises in Electrochemistry, Groups St Andrews 1989: Volume 1 (London Mathematical Society Lecture Note Series), National Geographic Countries of the World: Japan, Opium Traders and Their Worlds-Volume One:A Revisionist Expose of the Worlds Greatest Opium Traders, Sticking Patterns: Book & CD, The Journey That Never Was: A Guide to Hearing Gods Voice Regardless of Ones Faith, Religion, or Personal Beliefs,

Trait anxiety refers to a tendency to have a high degree of anxiety that is generalized and pervasive across a wide range of situations.
