

A classic of phenomenology and existentialism, The Phenomenon of Life sets forth a systematic and comprehensive philosophy--an existential interpretation of biological facts laid out in support of his claim that the mind is prefigured throughout organic existence. Hans Jonas shows how life-forms present themselves on an ascending scale of perception and freedom of action, a scale reaching its apex in a human beings capacity for thought and morally responsible behavior.

Galatians and Christian Theology: Justification, the Gospel, and Ethics in Pauls Letter, Childrens Social and Emotional Wellbeing in Schools: A Critical Perspective, A Taste Of Defeat, A Treatise on Differential Equations, Der kleine Findefuchs sagt Dankeschon (German Edition),
